

As an XM radio customer of a year now I was very excited to see that they started to offer local up to date weather and traffic. I was VERY sad to see people like the NAB trying to block this service now. I am sure this is just like they did when Dishnetwork and Direc TV started to carry local broadcast also. This nation is based on free speech and informing PAYING customers of local traffic is a right that XM radio has to broadcast. If local radio stations are affraid of losing listeners than maybe they should re adjust how many commercials and worthless talk time they provide to the local cumminty and stop crying. Blocking XM radio from broadcasting this info to is paying customers is crazy and the NAB need to stick their noses somewhere else and leave XM radio alone, they are just mad that thier radios stations can not touch the quality of product that XM is providing.
